PROFIL

I am a graduate of the Krakow University of Technology and have been involved in front-end development for 4 years. In all my free time, I also work on my own projects, developing my skills and gaining experience. I enjoy developing my skills in the frontend. I am very open to new experiences. I am sociable and make new friends very quickly. I like challenges and I really appreciate the friendly atmosphere and good relationships in the team. My goal is primarily to develop in the entire development ecosystem and become independent.
I make sure to take another step in this direction every day.

TECHNOLOGIES

- Very good knowledge of **HTML**, **CSS** i **JS**
- Creating responsive websites (**RWD**)

- Maintaining technical documentation
- Working with **Git** with **GitHub**
- Knowledge of website optimization methods (**SEO**)
- Working with **CI/CD** tools

CHOSEN PROJECTS

Mr. Pancake

Mr. Pancake is an original restaurant-themed web application.
It is the restaurant's website and also an online store where you can browse the products offered, learn about the history of its establishment, obtain the company's contact information, share your opinion, check the opening hours, location of the company, and browse and order products with home delivery.

The application contains:
- login and user registration system,
- function of adding products to the cart,
- support for multiple screen widths (RWD),
- Angular integration with the Firebase platform from which these are downloaded
- data such as user information or product database
- unit integration and e2e tests
