- ✓ Ability to build applications by using js and css (without frameworks)
- ✓ Performing tests (unit and integral) with use of the Jest library,
- ✓ Also knowledge of using backend technology (databases – MongoDB & MySQL, REST API, PHP)

CHOSEN PROJECTS

Cookie Landing Page

It's a single-page website created in dedication to the „Cookie Diet Tracker App".The project includes presentation of the app, „About us" section, dynamicly changing comments and contact panel

Cookie Diet Tracker App

This app is designed to help you keep track of your caloric intake. Thanks to it, you can control not only the caloric content of your meals, but also the content of protein, fat and carbohydrates in your meals. Thanks to the weekly schedule used, you can dynamically plan your menu and check your history of eaten meals.

PROFILE (about me)

I am a 3rd year student and for about 2 years I have been creating in web technology. My main goal is to gain knowledge and experience in web development. I really appreciate good atmosphere and pleasant relations with the team. I try to not use any frameworks and libraries in my projects, but to learn by using pure js and css.
